**Vintage**

There is no doubt that this 2018 vintage will go down in history, both in terms of the unusual climatic conditions that marked the year, as well as the progress and quality of the harvest.

Throughout the year, the weather conditions were dreadful! During the first 7 months, Alsace recorded the equivalent of one full year of rainfall, allowing the soils to replenish their water reserves. Despite this, the growth cycle has been done perfectly. While budburst was later than in previous years, flowering was very fast and very early (late May), underlining the earliest maturity of the vintage. But the most important thing was that, despite the heavy rainfall, the vineyard sanitary conditions could be preserved, enhanced by the 2nd warmest summer since 1900! Indeed, the summer 2018 was marked by the almost continuous persistence of temperatures above seasonal values and by an exceptional heat wave that affected the entire country from 24 July to 8 August.

The conditions of the harvest were absolutely exceptional, with perfect quality and quantity. The first results in the cellar are very promising: very satisfactory balances despite lower acidity than in the average year, very aromatic and fruity wines, with beautiful dry extracts.
